

## Aqua Barrier® for Pool Repair & Maintenance

### Benefits of using the Aqua Barrier® system:

\* Aqua Barriers® are quickly and easily installed and removed saving you time and money. Simply pump existing water into the barrier to inflate, and then drain the water back into the pool after the work is completed.

\* For large pools, the Aqua Barriers® can be used to make pool repairs without completely draining the entire pool area, conserving water.

\* Engineered for safety: Extensive engineering went into the design of Aqua Barriers®, culminating in our exclusive patented inner-baffle system. The result is a water control system that is safe, stable and effective.

\* Environmentally friendly.

\* Compact for shipping and storage.

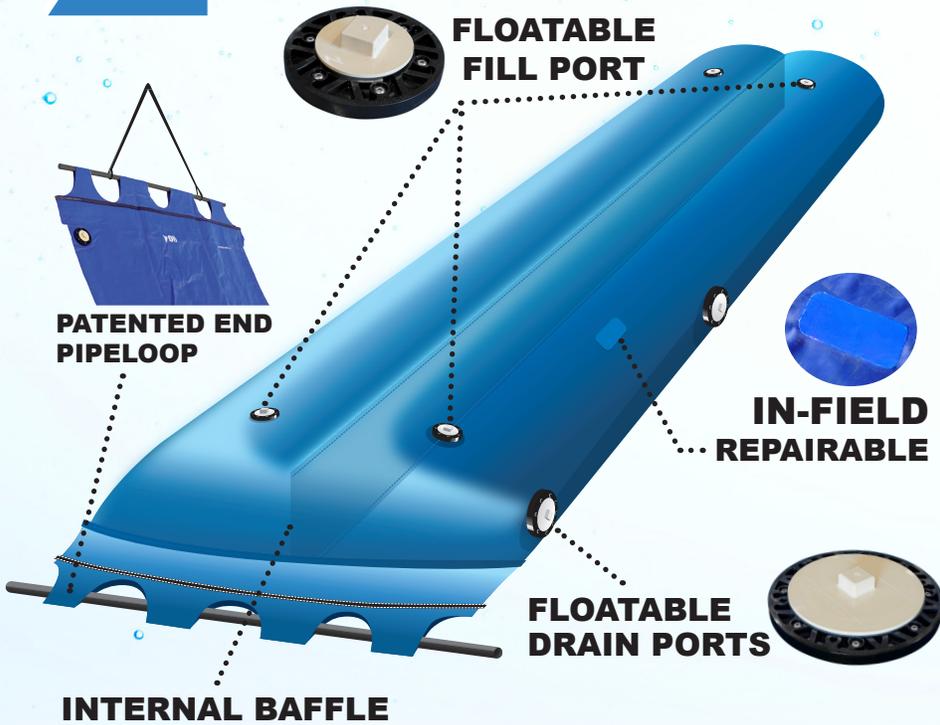

\* Available for purchase.
